Off Paper

- Powered by Tokeniser

Identity sheet
Cover art, thumbnails, opening sequence

COLOUR

Slate
#343740 · base, every background

Mint
#A2FFC8 · accent, sub line, tiles

Light Mint
#DAFDE5 · show name, titles

Light Blue
#C9DBF1 · secondary text, photo backdrop

Blue
#323B70 · light in motion, panels

Teal
#009C9C · accent on light grounds

Orange
#FF9A81 · not used in show art

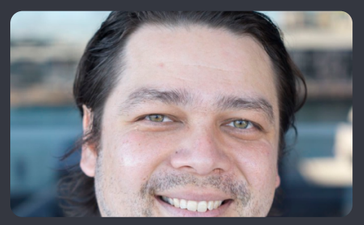

Roughly 60 Slate, 22 Light Mint, 10 Mint, the rest Blue and Light Blue. Only the Tokeniser palette is used. Orange stays out of show art so nothing reads as an alert or a price move.

TYPE: MONTSERRAT ONLY

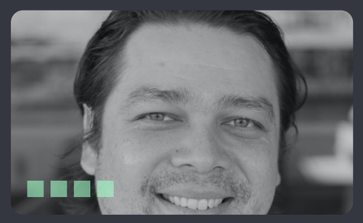

ExtraBold 800	**Episode titles**	show name, episode titles, EP number
SemiBold 600	- Powered by Tokeniser	sub line, labels
Bold 700	**Guest Name**	guest name
Medium 500	Organisation	organisation, body copy

Sentence case. Thumbnail titles are 84 to 112 px on a 1920 px canvas, at most three lines, so they stay at least 16 px tall on a 360 px wide phone thumbnail.

PHOTOS

Supplied photo

Grayscale, 30 percent Slate overlay, tiles at 60 percent

Guest photos are always grayscale with a 30 percent Slate overlay, so any headshot sits in the palette. Cut out photos sit on Light Blue. The thumbnail maker applies this automatically.

SHOW NAME

Off Paper
- Powered by Tokeniser

Stacked: cover, opening, square formats

Off Paper - Powered by Tokeniser

Inline: thumbnail header, small spaces

Always exactly **Off Paper - Powered by Tokeniser**: a plain hyphen with a space each side. Never "Off-Paper", "OffPaper", all capitals or a different dash. The first line carries the weight; the second line is always present.

TOKENISER LOGO

tokeniser

On dark: Slate, Blue, photos

tokeniser

On light: Light Mint, Light Blue

tokeniser

Square avatar

- Use the supplied PNG as is, scaled evenly.
- Sits on the same left margin as the show name, or centred under it.
- Clear space: the height of the logo on every side.

- No recolouring, outlines, shadows or redrawing.
- No stretching, rotating or cropping.
- Not smaller than 200 px wide at 1920 px.

Colours, type and logo from the Tokeniser brand resources

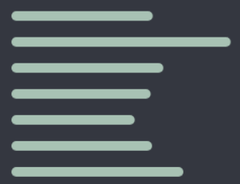

Graphic devices

Paper becoming tokens

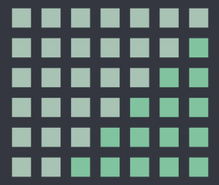

Devices 70 percent on solid colour, 60 percent on photos
Photos: grayscale plus a 30 percent Slate overlay

Cut sheet. A page outline with the top right corner cut at 45 degrees. Also the shape of the thumbnail photo panel.

Ledger lines. Rounded bars that read as a printed page, never as words.

Token tiles. Squares on a strict grid. Light Mint while moving, Mint once they lock in.

Emblem. 3 x 3 tiles with the top right tile missing, the same corner the sheet is cut at.

APPLICATIONS

Cover art, 3000 x 3000

Thumbnail template: EP number, title, guest name, guest photo

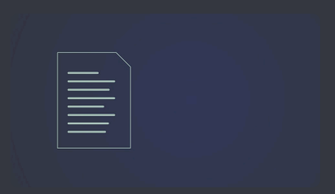

Same template, new episode: only the four slots change

Two guests: optional second photo slot

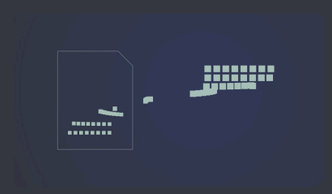

OPENING SEQUENCE, 15 SECONDS, LANDSCAPE AND VERTICAL

0 to 2.5 s: a page draws in

2.7 s: a scan turns lines into tiles

4 to 7 s: tiles leave the page

7 to 9 s: grid links, verified in Mint

9 to 10 s: grid folds into the emblem

10 to 14 s: name and logo, then fade to Slate

9:16 layout

Motion is calm and exact: ease in and out, no bounce, no shake, one slow push in. Sound is original synthesised music: a D minor pad that resolves to D major as the name lands, with a fine tick for each line and a soft click for each locked row. No voice, no words, and the only on screen text is the show name and the Tokeniser logo.

Every visual is drawn from one shared file, src/brand.js
